Concepta São Paulo | Valinhos

We are Concepta!

A Brazilian company that supplies innovative ingredients to the food and beverage, pharmaceutical, nutraceutical, flavor, animal health and nutrition, supplementation and sports nutrition industries. Our portfolio currently includes more than 50 natural, organic, sustainable and traceable products, ranging from ingredients from Brazilian biodiversity to technology-added inputs capable of meeting the most specific and demanding requirements of the sectors we serve.

One of Concepta's trademarks is the fact that our production chain is aligned with the values defended by the UN, in particular Sustainable Development Goals (SDGs) 12 (Responsible Consumption and Production) and 15 (Life on Land). Together with our partners, we create differentiated products, promoting local social and economic development, environmental protection and fair trade.

In addition, we are part of important business initiatives in the pursuit of sustainability, such as the UN Global Compact, the Brazilian Business Council for Sustainable Development (CEBDS) and the Plant Based Foods Association (PBFA). All our efforts have generated recognition in the form of certifications, such as the Great Place to Work (GPTW), which reinforces our commitment to promoting the well-being of our employees, and FSC 22000, which attests to our operation's compliance with the highest standards of quality and food safety.

Concepta Ingredients' factory, located in Valinhos, in the interior of São Paulo, is strategically located in a region with a strong logistics structure (highways and airports), and has a showroom for presenting the portfolio to customers. The site occupies an area of 7,800 m² and brings together the most modern in industrial technology, from production to quality control.

Pharmaceutical Supplies

Tailor-made to meet the high standards of quality and safety that are so characteristic of the pharmaceutical industry, and manufactured using the latest in industrial technology, either in partnership with renowned global partners or at our Valinhos (SP) plant, where our USP Grade Vegetable Oils are produced, the ingredients that make up Concepta's Pharmaceutical Supplies range represent our commitment to supplying products that are essential to human health. We ensure that our customers have access to raw materials that not only meet the strictest regulatory requirements, but also provide confidence and efficacy in the final products.

Through this product range, we have materialized our alignment with the SDGs:

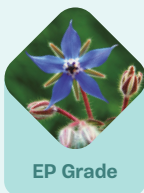

Vegetable Oils

Vegetable Oils

The comprehensive range of Vegetable Oils, created to serve the pharmaceutical and nutritional supplement sectors, stands out for its origin and quality. Produced by Concepta itself or global partners, this range guarantees not only versatile ingredients, but also the confidence to meet the specific requirements of these market segments with excellence. Our active ingredients meet the quality parameters of the United States (USP - United States Pharmacopeia) and/or Europe (EP - European Pharmacopeia), which demonstrates Concepta's commitment to safety and efficacy.

EP Grade

Borage oil *Borago officinalis*

- Refined Borage Oil
- The most abundant plant source (at least 20%) of gamma-linolenic acid (GLA)
- High percentage of omega-6 and gamma-linolenic

Application: pharmaceutical products and food supplements

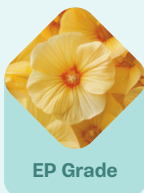

USP Grade

Coconut Oil *Cocos nucifera*

- Refined Coconut Oil
- Contains medium-chain fatty acids and lauric acid

Application: pharmaceutical products and food supplements

EP Grade

Evening Primrose Oil *Oenothera biennis L.*

- Refined Evening Primrose Oil
- High content of linoleic acid and gamma-linolenic acid

Application: pharmaceutical products and food supplements

USP Grade

Sesame oil

Sesamum indicum L.

- > Refined Sesame Oil
- > Contains omegas 6 and 9 and vitamin E
- > High concentration of linoleic acid and oleic acid

Application: pharmaceutical products, food supplements and vegetable oil blends

USP Grade

Sunflower oil

Helianthus annuus Linné

- > Refined Sunflower Oil
- > Contains omegas 6 and 9 and vitamin E
- > Very resistant to oxidation and high in polyunsaturated fatty acids: linoleic acid

Application: pharmaceutical products and food supplements

EP/USP Grade

Linseed oil

Linum usitatissimum L.

- > Cold Pressed Linseed Oil (EP Grade) and Refined Linseed Oil (USP Grade)
- > One of the main plant sources of omega-3, alpha-linolenic (C18:3)
- > Contains Alpha tocopherol (Vitamin E)

Application: pharmaceutical products and food supplements

USP Grade

Soybean oil

Glycine max

- > Refined Soybean Oil
- > High concentration of linoleic acid and oleic acid
- > Natural presence of vitamin E

Application: pharmaceutical products and food supplements

USP Grade

Corn Oil

Zea mays

- > Refined Corn Oil
- > High phytosterol content

Application: pharmaceutical products and food supplements

EP/USP Grade

Medium Chain Triglyceride (MCT)

Palm MCT

Elaeis guineensis

Coconut MCT

Cocos nucifera L.

EP Grade

- > Carrier of pharmaceutical active ingredients
- > High spreadability
- > High oxidative stability
- > Contains C8 and C10

Application: pharmaceutical products, emulsions and creams and food supplements

Surfactants and Pharmaceutical Vehicles

Our Surfactants and Pharmaceutical Vehicles range has been carefully developed to meet the highest demands of the pharmaceutical industry. Composed of Ethyl Oleate, PG C8/C10 and Polysorbate 80, our range offers versatility and superior performance in a variety of formulations.

EP Grade

Ethyl oleate

- > Carrier of pharmaceutical actives
- > Rapid skin absorption

Application: pharmaceutical preparations, plasticizer and lubricant

EP Grade

PG C8/C10

Propylene glycol Dicaprylate Dicaprate

- > Highly spreadability carrier of pharmaceutical actives

Application: pharmaceutical products

USP Grade

Polysorbate 80

- > Ethoxylated Sorbitan Monooleate

Application: surfactant for pharmaceutical use
